Award Winning

Interchangeable Heads

The world's first interchangeable heads system for the Valiani cmc range

Valiani has introduced a new array of Interchangeable cutting Heads for its entire line of computerised mat cutters. Chosen as the **Art and Framing Industry Awards 2008 "Innovation of the Year"**, these heads are retained and positioned to the cutting head assembly by means of several small, yet powerful magnets, which make locking fasteners and hardware unnecessary. A specialized wedge-fork tool is supplied that makes removal of each head easy, safe and fast in under 20 seconds. Each tool head is colour-coded and numbered to help simplify recognition at a glance.

Combined with the unique Valiani interchangeable cutting head system, all the Computerised Machines will greatly expand your creativity – and your productivity. With up to 7 different heads: three different bevel cuts, two straight cuts, an embossing tool and a drawing head, the user can easily change type of cutting head/angle and material. Cutting can be done from either the front or rear mat surface, thin foil on up to 5 mm(3/16") and thick board.

Blue 45° Rear Surface Bevel Cut

It's designed especially for cutting mat from the rear, or non-presentation side of the mat. Use this cutting head option when a delicate surface mat may be damaged by one of the front surface bevel cutting heads, or when cutting very thick or dense mats up to 4.4 mm (12-ply) in thickness. The 45° rear surface head can also be used to cut foam board with a bevel up to 5mm (3/16 inches), which can facilitate the creation of thick mat spacers or foam board deep-bevel fabric wraps.

Red 45° Front Bevel Cut

The new 45° bevel head produces a wider, more dramatic bevel edge that many customers have become accustomed to. This cutting head option works well on all mat types up to 3.5 mm (8-ply) in thickness, but is somewhat limited in its ability to cut very fine detail and small radius curves.

Yellow 90° Multi Material

This cutting head is developed especially for cutting foam board, softer, thicker foam-core materials and corrugated cardboard up to 5 mm (3/16 inches) thick. Plastic (PVC) and hardboard (backing board) material can also be cut from 2mm to 3 mm (0.078 to 0.118 inches) thick. It also uses a wide glide pad instead of a roller to avoid indentation of the softer foam board surface.

Purple Embossing Tool

The new tool enables users of Valiani CMCS to create subtle embossed mount decoration and accents. Any shape or design, including clip art, can be elegantly embossed into the mat surface. Embellish your mats with endless possibilities by using FMD software. The head, completely produced in aluminium, includes 3 different size of tips (diameter balls), allowing the user to realize various decorations. The embossing tool can also be used to create scored creases on either side of a mat to help with folding mat board or cardboard for custom boxes and other items.

White 90° Mat Board

For cutting either openings or sizing of mat board, up to 4.4mm (12 ply) thickness. Eliminates the sharp mat edges that can be difficult to handle when sized with a sharp bevel cut.

Green 40° Front Bevel Cut

This is the standard bevel-cutting head that is included with all machines. This head offers the greatest versatility with regard to cut all standard openings, shapes, double mats, detailed font and overall utility. Excellent cut quality from V-grooves and foil mats up to 3.5 mm (8-ply) .

MatStylus® DeLuxe

The original drawing head for the Valiani cmc

1st

world's first
high precision
drawing tool

Introducing the newest addition to the line of award winning Interchangeable Heads of the Valiani Family of Mat Cutting Machines. The amazing **MatStylus DeLuxe**® revives the lost art of French Matting by allowing any user to add creative, eye catching design elements to a variety of mat surfaces.

The Valiani **MatStylus DeLuxe**® is completely managed by the Valiani **Future Mat Designer**® software and allows the user to convert any Template, Corner Design, Text and even Clip-Art into a line drawing.

The **MatStylus DeLuxe**® includes 3 different sizes of adapters, allowing the user to insert various sizes and brands of pens, pencils, plotter pen cartridges and felt-tip pens.

The new **MatStylus DeLuxe**® now offers increased accuracy and flexibility with many types of drawing tools. Multiple two-part pen holders of different sizes are supplied while as an optional you can require plotter-pen cartridge holder.

Features:

Increased precision with all pen types; new conical-tip pen holders keep the writing instrument's point accurately centered. This results in more repeatable line concentricity, especially when changing pen types and colours on the same mat design.

Three colour-coded barrel-holder sizes combined with three tip-holder types allow much greater flexibility in pen size and type selection.

Two-point pen holder design increases stability during drawing, particularly with sharp changes in line direction.

Quick and easy tool-free pen changes; all pen holders' outside diameters are the same regardless of pen type used.

Magnetic, removable pen-depth gauge makes depth setting fast, simple, and precise.

Create intricate & precise French Lines of any colour and thickness and add a signature to any mat with ease.

Enhance your designs with text using virtually any Font and decorate your mats with fancy Clip-Art, logos, line-art, etc.

Use CorelDRAW to showcase your unique designs and your unique creativity.

Examples of creativity and effects achieved by the various Interchangeable Heads. Images supplied by our customers, to whom we are truly grateful.

Award Winning Interchangeable Heads

Best of all, the totally modular i-series interchangeable head system offers the flexibility to accommodate matting materials and design concept of the future

Combined with the unique VALIANI interchangeable head system, all the COMPUTERIZED Machines will greatly expand your creativity and your productivity,

The Interchangeable Heads system comprises 7 different tools, all with distinctive advantages and applications, that the user can change depending on the work he has to make or the materials he has to cut. The heads can cope with all varieties of common and emerging materials such as: Mat board, Foam board, Gate board, polyester and Polycarbonates, Forex, Self-adhesive vinyl, Corrugated and folding card-board.

One machine, numerous possibilities..... in less than 20 seconds

Valiani throughout the world
