

Astra

Manual Mat Cutter

The Valiani Astra 120/150 bench top mat cutting machine has evolved to the next level. The Astra is available in cutting capabilities of 1250mm (49") and 1550mm (61") and cuts mats of varying thickness. The machine, as standard, is supplied with magnetic stops, measuring stops, easy to use blade holder and an extension arm.

The cutting head slides on four ball bearings which glide on two sturdy non-warping tempered steel tracks constantly cleaned by two small brushes placed beneath it.

The measuring stops are simply adjusted and allow precision cuts on all 4 sides of the mat board, therefore drastically reducing overcuts and undercuts

Astra 120

Overall Dimensions: 50cm x 150cm (20" x 60")

Astra 150

Overall Dimensions: 50cm x 180cm (20" x 70")
