Interchangeable Heads

Award Winning Interchangeable Cutting Head System

Valiani has introduced a new array of Interchangeable cutting Heads for its entire line of computerized mat cutters. Selected as the Art and Framing Industry Awards 2008 "Innovation of the Year", these heads are retained and positioned to the cutting head assembly by means of several small, yet powerful magnets, which make locking fasteners and hardware unnecessary. A specialized wedge-fork tool is supplied that makes removal of each head easy, safe and fast in under 20 seconds. Each tool head is color-coded and numbered to help simplify recognition at a glance.

Combined with the unique Valiani interchangeable cutting head system, all the Computerized Machines will greatly expand your creativity – and your productivity. With up to 6 different heads: three different bevel cuts, two straight cuts and a decoration tool, the user can easily change type of cutting head/angle and materials. Cutting can be done from either the front or rear mat surface, from thin foil mats on up to 5 mm (3/16") thick foam board thanks Valiani innovation.

* INTERNATIONAL PATENT PENDING

Highlights: Interchangeable Cutting Head System

- Choice of 5 Optional head types for varied cutting applications and one for embossing
- Cutting heads can be changed safely and easily in under 20 seconds
- 45° Front or 45° Rear surface cutting for wider, more dramatic bevel cuts
- 90° multilaterals cutting heads for mat board, cardboard, and up to 5mm (3/16") foam board
- Fast, simple, economical 90° cutting for mat blanks, backing materials, spacer strips, or mat openings
- Embossing head for subtle decorative designs on the mat surface: Fonts, clip art, custom accents
- Best of all, the totally modular i-Series interchangeable tool head system offers the flexibility to accommodate matting materials and design concepts of the future.

Award Winning Interchangeable Cutting Head System

One machine, numerous possibilities..... in just 20 seconds

Green 40° Front Bevel Cut

This is the standard bevel-cutting head that will ship with all machines. This head offers the greatest versatility with regard to cut all standard openings, shapes, double mats, font details and overall utility. Excellent cut quality from V-grooves and foil mats on up to 3.5 mm (8-ply) rag mat can be produced.

Red 45° Front Bevel Cut

The new 45° bevel head produces a wider, more dramatic bevel edge that many customers have become accustomed to. This cutting head option works well on all mat types up to 3.5 mm (8-ply) rag in thickness, but is somewhat limited in its ability to cut very fine detail and small radius curves.

Blue 45° Rear Surface Bevel Cut

It's designed especially for cutting mat from the rear, or non-presentation side of the mat. Use this cutting head option when a delicate surface mat may be damaged by one of the front surface bevel cutting heads, or when cutting very thick or dense mats up to 4.4 mm (12-ply) rag in thickness. The 45° rear surface head can also be used to cut foam board with a bevel up to 5mm (3/16 inches), which can facilitate the creation of thick mat spacers or foam board deep-bevel fabric wraps.

Yellow 90° Multi Material

This tool head is developed especially for cutting foam board, softer, thicker foam-core materials and corrugated cardboard up to 5 mm (3/16 inches) thick. Plastic (PVC) and hardboard (backing board) material can also be cut from 2mm to 3 mm (0.078 to 0.118 inches) thick. It also uses a wide glide pad instead of a roller to avoid indentation of the softer foam board surface.

White 90° Mat Board

For cutting either openings or sizing of mat board, up to 4.4mm (12 ply) thickness. Eliminates the sharp mat edges that can be difficult to handle when sized with a sharp bevel cut.

Purple Embossing Tool

A unique embossing tool for creating subtle, yet distinctive mat decoration and accents. Any Shape or Corner design, as well as fonts and clip art can be elegantly embossed into the mat surface. The embossing tool can also be used to create scored creases on either side of a mat to help with folding mat board or cardboard for custom boxes and other items.

Insert the wedge-fork tool. Remove the head.
Swap with the new head. New head in a few seconds.
